

HARSH SINGLA

AI Engineer | Machine Learning Engineer | Generative AI Developer

[Mohali, India] (Open to Bengaluru / Gurgaon / Noida / Delhi) | [7658002221] | [harshsingla724@gmail.com] | [[LinkedIn](#)] | [[GitHub](#)]

PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience building and shipping AI applications spanning Machine Learning, LLMs, Voice AI, and Generative AI. ML Engineering intern at LBM Solution Pvt. Ltd.; completed the Tata GenAI Virtual Internship building a credit delinquency prediction system. Published researcher on No-Code AI, currently pursuing a BSc in AI & Machine Learning (Final Year). Skilled at designing production-ready pipelines, integrating LLMs via Ollama, and shipping end-to-end AI products from prototype to deployment.

TECHNICAL SKILLS

Programming: Python, SQL

Machine Learning: Scikit-learn, TensorFlow, Pandas, NumPy, Feature Engineering, Model Evaluation

Generative AI / LLMs: Ollama, Prompt Engineering, LLM Integration, Vapi (Voice AI)

Frameworks & APIs: Flask, REST API Integration

Databases: SQLite, MySQL

Tools: Git, GitHub, VS Code, Postman

WORK EXPERIENCE

Machine Learning Engineer Intern — LBM Solution Pvt. Ltd.

45 days summer

- Built and trained machine learning models in Python and Scikit-learn, delivering prediction pipelines for real-world datasets.
- Performed data preprocessing and feature engineering to improve model accuracy and reliability.
- Improved model performance through iterative experimentation and evaluation across multiple algorithms.
- Collaborated cross-functionally on AI application development from prototyping through delivery.

Generative AI Virtual Intern — Tata GenAI Program

Project: Credit Delinquency Prediction System

- Designed an end-to-end credit delinquency prediction pipeline covering data preprocessing, EDA, and feature engineering.
- Trained and evaluated Random Forest and Logistic Regression models to classify delinquency risk.
- Generated AI-assisted business recommendations from model outputs to support data-driven decision-making.

PROJECTS

Lyra AI Chatbot

Python, Ollama, Flask, SQLite

- Built a locally-hosted LLM-powered chatbot using Ollama, enabling natural language conversations via a modular backend architecture.
- Applied prompt engineering to optimize response quality and implemented local AI inference for low-latency performance.

AI Interview Assistant

Python, Flask, OpenCV, Ollama, SQLite, SpeechRecognition

- Developed an AI-powered interview simulation platform generating role-specific questions from resume analysis and job descriptions.
- Integrated real-time speech recognition and a local LLM (Ollama) to deliver automated post-interview feedback.
- Implemented computer vision-based behavioral analysis (face detection, eye-contact and blink tracking) to assess candidate engagement, with session management via SQLite.

Vapi AI Calling Agent

Python, Vapi, LLM, Voice AI, API Integration

- Built an AI-powered voice calling agent that automates phone conversations using conversational AI and real-time dialogue handling.
- Applied prompt engineering and API integration to automate customer interactions and voice-based workflows.

Titanic Survival Predictor

Python, Pandas, NumPy, Scikit-learn, Matplotlib

- Built a complete ML pipeline — data cleaning, feature engineering, and EDA — to predict passenger survival.
- Trained and compared Logistic Regression, Decision Tree, and Random Forest models, optimizing for accuracy.

RESEARCH

- Published research paper on No-Code AI — "No Code AI Automation using n8n: Bridging the Gap Between AI and Workflow System" Bharti Publications [2026]).

EDUCATION

BSc, Artificial Intelligence & Machine Learning

2024-2027

Chandigarh Group Of Colleges, Landran. Final Year

CERTIFICATIONS

- Summer Internship — Machine Learning Engineering, LBM Solution Pvt. Ltd.
- Tata GenAI Virtual Internship (Forage)
- Hackathon Certifications.
